Subject: Microsoft settlement

I have believed for a long time that IBM and Microsoft created a new and great market. The early statements by the leaders of both companies shows the extent of growth was unplanned. I am not against Microsoft doing business. I am against illegal business practices.

The settlement should STOP the illegal business practices of Microsoft. The published proposed solution is a PR and marketing win for Microsoft. It does nothing stop the illegal business practices (a finding of the appeals court) of Microsoft.

Please give our country a solution, that will restrain Microsoft from breaking the law. My God give you wisdom.
